ASTEA®

Astea International is a premier global provider of Service Lifecycle Management solutions for companies that market, sell, service and support equipment. For **nearly 40 years**, Astea has been helping more than 600 companies achieve new levels of service excellence. We are currently seeking talented individuals with an entrepreneurial, hands-on spirit to help take our company to the next level.

Because of continued growth we are currently hiring for a **Senior Mobile Solution Developer** role in our **Horsham, PA Corporate Office.**

Title: Senior Mobile Solution Developer
Reports to: Mobile Support Manager

Summary:
The primary functions of this job are threefold: To design and develop the Astea Mobile product, to customize the Astea Mobile product to meet the needs of specific customers and to support the usage of the Astea Mobile product for our current customers. The Senior Mobile Solution developer is considered the subject matter expert on the Astea Mobile application and will serve as a lead technical resource and participate in all phases of the development life cycle. They will analyze complex business processes and technical problems and participate in all discussions that shape the Astea Mobile product going forward. They will also mentor less experienced developers and enforce software development standards to ensure product quality.

Responsibilities:
* Capturing business requirements and translating those into the technical specifications used by the team
* Work in a dynamic environment developing new applications and modifications to existing applications to support a variety of new and existing business initiatives
* Provides expertise in all aspects of application and system design and application development
* Work closely with backend development team to ensure a seamless delivery of the mobile solution into the Astea Alliance backend application
* Continuous self-development through expanded product knowledge, utilizing newly implemented technology and staying abreast of the latest relevant technologies
* Work independently in a team environment as well as mentoring team members to develop and support existing applications
* Develop and maintain a comprehensive understanding of Astea offerings and obtain industry domain knowledge
* Ability to communicate effectively (written and verbal) with employees, management and other team members in a concise and professional manner
* Perform code reviews, train Mobile Solution Developers on best practices, enforce software development standards
* Prepare documentation for any new development projects (standard or custom)
* Domestic and International travel may be required

Requirements:
* Related Bachelor's Degree (BS) from a four-year college or university in business, software engineering or computer science or related field
* Familiar working with Android and iOS devices
* Experience with Javascript, HTML5 and CSS and mobile development
* Working experience with JSON, AJAX, Microsoft.NET (C#)
* Familiar with source control management systems (TFS)
* Experience with AngularJS, Sencha, Cordova, or iOS/Android development is a plus
* Basic knowledge of software development methodologies, design and implementation
* Good analytical and design skills at single-product/single-environment level
* Ability to learn how business issues may impact overall project plans
* Outstanding communication and customer service skills
* Familiar with SQL Server including developing queries
* Minimum of 5 years mobile application development software experience.
